FOR THE PRESERVATION OF THE HALIBUT FISHERY OF THE  
NORTHERN PACIFIC OCEAN AND BERING SEA

**Short Title**

1. These regulations may be cited as the Pacific Halibut Fishery Regulations.

**Interpretation**

2. (1) In these Regulations,

“automated hook stripper” (commonly known as a crucifier) means a device through which the groundline can be passed during gear retrieval which allows the groundline and hooks to pass freely, but does not allow fish to pass, thereby removing fish from the hooks;

“charter vessel” means a vessel used for hire in sport fishing for halibut, but not including a vessel without a hired operator;

“commercial fishing” means fishing the resulting catch of which either is or is intended to be sold or bartered;

“Commission” means the International Pacific Halibut Commission;

“fishery officer” means any State, Federal, or Provincial officer authorized to enforce these regulations including, but not limited to, the National Marine Fisheries Service (NMFS), Canadian Department of Fisheries and Oceans (DFO), Alaska Department of Fish and Wildlife Protection (ADFWP), and the United States Coast Guard (USCG);

“fishing” means the taking, harvesting, or catching of fish, or any activity that can reasonably be expected to result in the taking, harvesting, or catching of fish, including specifically the deployment of any amount or component part of setline gear anywhere in the maritime area;

“fishing period limit” means the maximum amount of halibut that may be retained and landed by a vessel during one fishing period;

“land” with respect to halibut means to bring to shore and to offload;

“license” means a halibut fishing license issued by the Commission pursuant to sections 12 and 20;

“maritime area”, in respect of the fisheries jurisdiction of a Contracting Party, includes without distinction areas within and seaward of the territorial sea or internal waters of that Party;

“operator”, with respect to any vessel, means the master or other individual on board and in charge of that vessel;

“overall length” of a vessel means the horizontal distance, rounded to the nearest foot, between the foremost part of the stem and the aftermost part of the stern (excluding bowsprits, rudders, outboard motor brackets, and similar fittings or attachments);

“person” includes an individual, corporation, firm or association;

“regulatory area” means an area referred to in section 5;

---

“setline gear” means one or more stationary, buoyed, and anchored lines with hooks attached;

“sport fishing” means all fishing other than commercial fishing and treaty Indian ceremonial and subsistence fishing;

“tender” means any vessel that buys or obtains fish directly from a catching vessel and transports it to a port of landing or fish processor.

(2) In these Regulations, all bearings are true and all positions are determined by the most recent charts issued by the National Ocean Service or the Canadian Hydrographic Service.

### **In-Season Actions**

3. (1) The Commission is authorized to establish or modify regulations during the season after determining that such action

(a) will not result in exceeding the catch limit established pre-season for each regulatory area;

(b) is consistent with the Convention between the United States of America and Canada for the Preservation of the Halibut Fishery of the Northern Pacific Ocean and Bering Sea, and applicable domestic law of either Canada or the United States; and

(c) is consistent, to the maximum extent practicable, with any domestic catch sharing plans developed by the United States or Canadian governments.

(2) In-season actions may include, but are not limited to, establishment or modification of the following:

- (a) fishing periods;
- (b) fishing period limits;
- (c) recreational bag limits;
- (d) closed areas;
- (e) size limits;
- (f) gear restrictions; or
- (g) vessel clearances.

(3) In-season changes will be effective at the time and date specified by the Commission.

(4) The Commission will announce in-season actions under this section by providing notice to major halibut processors; Federal, State, United States treaty tribal, and Provincial fishery officials; and the media.

### **Application**

4. (1) These Regulations apply to persons and vessels fishing for halibut in waters off the west coast of Canada and the United States, including the southern as well as the western

## Catch Limits

9. (1) The total allowable catch of halibut to be taken during the halibut fishing periods specified in section 6 shall be limited to the weight expressed in pounds or metric tons shown in the following table:

Regulatory Area	Catch Limits	
	Pounds	Metric Tons
2A	195,000	88
2B	7,800,000	3,538
2C	8,000,000	3,629

(2) The weights in each catch limit shall be computed on the basis that the heads of the fish are off and their entrails removed.

(3) The Commission shall determine and announce to the public the date on which the catch limit for each regulatory area will be taken and the specific dates during which fishing will be allowed in each regulatory area.

(4) If the Commission determines that the catch limit specified in subsection (1) would be exceeded in an unrestricted 24-hour fishing period, or an unrestricted 12-hour fishing period as specified in sections 6(3) and 6(6), in any regulatory area, the catch limit for that area shall be considered to have been taken unless fishing period limits are implemented.

(7) When under subsections (3), (4), (5), or (6) the Commission has announced a date on which the catch limit for a regulatory area will be taken, no person shall fish for halibut in that area after that date for the rest of the year, unless the Commission has announced the reopening of that area for halibut fishing.

## Fishing Period Limits

10. (1) It shall be unlawful for any vessel to retain or land more halibut than authorized by that vessel's license in any fishing period for which the Commission has announced a fishing period limit.

(2) When fishing period limits are in effect, a vessel's maximum allowable catch will be determined by the Commission based on

- the vessel's overall length in feet and associated length class;
