Concerns with Mortality Estimates

Commercial – U.S.A.

- **Discard mortality in Alaska**
 - inaccurate mean fish weight
 - No observer coverage for vessels less than 40 feet
 - Hook and line observer coverage is 7% in GOA and 10% in Bering Sea

Recreational – Canada and U.S.A

- **Self reporting of lodges in BC and AK**
- **No discard mortality reported for WA and CA**
- **OR discard mortality rolled over**

Subsistence – Canada and U.S.A.

- **Roll over since 2007 (Canada) and 2016 (U.S.A – AK)**

Bycatch in other fisheries – U.S.A.

- **Hook and line observer coverage is 7% in GOA and 10% in Bering Sea**
- **Non-pelagic trawl catcher vessel observer coverage is 8% in GOA**
- **Challenges with tendered versus non-tendered deliveries**

Deadlines

15 March – incidental salmon and sablefish

30 April – directed commercial

2018 Port Highlights

Canada

- Adding collection of marine mammal details to logbook – agreement with USA logbooks
- FLOAT logs collected in field via bluetooth from skipper's device to IPHC port sampler's device

2018 Port Highlights

Tissue Sampling Coastwide

- Determine sex of commercial catch
→ to inform stock assessment
- Fin clip from every sampled fish
- Initial lab prep completed in field

USA

- Seward – greatest amount of landings (weight)
 - Homer boats landed in other ports early on in the season.
 - Kodiak had slower start with more boats landing in Seward.
- Pot gear for Pacific halibut in the IFQ sablefish fishery has been confusing and challenging (esp. Seward) with respect to logbook records – additional training requested, especially for vessels <60 feet (new log)

2018 Port Highlights

Head-on requirement

- Implemented in 2017
- Fresh landings with head off
 - none in USA (2017 and 2018)
 - Canada
 - **11,821 lb (5.4 t or 0.2%) 2018**
 - **6,186 lb (2.8 t or 0.09%) 2017**
- Frozen landings with head off
 - none in USA (2017 and 2018)
 - Canada
 - 92,148 lb (41.8 t or 2%) 2018
 - 78,583 lb (35.6 t or 1%) 2017
- Challenges for industry
 - matching their head-off weight prices to the IFQ weight
