 - Formal *Recommendations*
 - Informal Requests

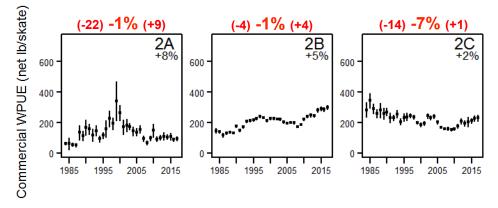

Pacific halibut stock assessment (2017): Data source development

SRB11–Rec.01 (para. 14) The SRB **RECOMMENDED** continuing to down-weight terminal year fishery CPUE in the annual stock assessment because terminal and post-season CPUE may be substantially different. Generating and presenting the conditional distribution for post-season CPUE given terminal CPUE, should be undertaken as a way to improve communication about most recent fishery CPUE values.

Commercial WPUE - Bias corrected

Commercial WPUE - Bias corrected

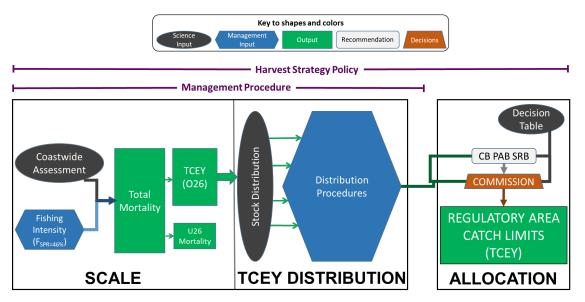

Management Strategy Evaluation: A description of the closed-loop simulations

SRB11–Rec.02 (para. 25) The SRB **RECOMMENDED** that the IPHC Secretariat and Management Strategy Advisory Board collaborate to:

- a) further clarify and improve the presentation of the Harvest Strategy Policy (<u>Appendix IV</u>). This would improve not only transparency of the existing interim harvest policy, but also of the MSE process for evaluating alternatives.
- b) Review harvest policies from other bodies to develop an objectives hierarchy that explicitly prioritizes long-term conservation over short-/medium-term (e.g., 3-8 years) catch performance.

SRB11–Rec.03 (para. 29) The SRB **RECOMMENDED** that the IPHC Secretariat hire a modeler/programmer to support MSE work so that timely feedback can be given the MSAB in the MSE process.

Harvest Strategy Policy

Biological and ecosystem science program: Presentation of potential future research projects

SRB11–Rec.04 (para. 36) The SRB **RECOMMENDED** that IPHC consider hiring a life-history modeler to provide more explicit linkage between the empirical biological program and the applied assessment and MSE modeling programs.

REPORT OF THE INTERNATIONAL FISHERIES COMMISSION

APPOINTED UNDER THE TREATY BETWEEN THE UNITED STATES AND GREAT BRITAIN FOR THE PRESERVATION OF THE NORTHERN PACIFIC HALIBUT FISHERY

NUMBER 2

LIFE HISTORY OF THE PACIFIC HALIBUT (1) MARKING EXPERIMENTS

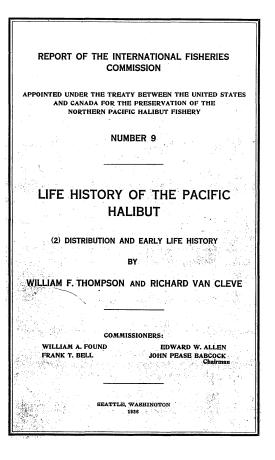

BY WILLIAM F. THOMPSON AND WILLIAM C. HERRINGTON

COMMISSIONERS

Requests from SRB-11

Requests from SRB-11

Size limit analysis for 2017: Update

SRB11–Req.05 (para. 21) NOTING the thoughtful and detailed presentation on the potential impacts of changing the minimum size limit presented in Appendix E (*Evaluation of adaptive management approaches*) of paper IPHC-2017-SRB11-07, the SRB **REQUESTED** that the IPHC Secretariat, between now and SRB12, seek feedback from the Commissioners, Conference Board, Processor Advisory Board, and the Management Strategy Advisory Board, on a modified version of Appendix E. In particular, a modified version would include (i) a process for starting and possibly ending an experiment, (ii) performance metrics, and (iii) criteria for making conclusions based on the experimental outcomes.

| | Status quo | | |
|--|------------|------------------|------------------|
| | 32" MSL | Reduced MSL | No MSL |
| Wastage | No change | unknown | Down |
| Total yield | No change | Up | Up |
| Harvest of males | No change | Up | Up |
| Selectivity | No change | unknown | unknown |
| Biological data on total catch | Incomplete | Incomplete | Sampled in port |
| Management robustness | No change | Down | Down |
| Recruitment refuge | No change | Down | Down |
| Fishery efficiency (retained catch-rate) | No change | Up | Up |
| Price | No change | Emergent | Emergent |
| Fishery value | No change | Depends on price | Depends on price |

Summary of MSL considerations

Requests from SRB-11

Biological and ecosystem science program: Progress on ongoing IPHC-funded research projects

SRB11–Req.08 (para. 32) The SRB **REQUESTED** that the IPHC Secretariat prepare a presentation for SRB12, on the overall reintegrated. Ultimation of the secretariat prepare a presentation of science presentations at full full full full for the secretariat prepare a presentation of science earch presentations would have been more effective nation for secretariat prepare a presentation for SRB12, biology, and policy are earch presentations would have been more effective nation occur.

- a) more precise linkages among key knowledge gaps within the biology, annual stock assessment, and MSE simulations;
- b) a specific suite of questions to be discussed during the SRB meeting;
- c) sufficient background material provided such that the SRB can provide informed comment and advice related to the specific questions in (b).

Thank you for your attention
