HALIBUT COMMISSION

# MSE Results

Agenda Item 6

IPHC-2020-MSAB016-09

# General Objectives

- Primary biological sustainability objectives
- Primary fishery objectives
  - Target Spawning Biomass to optimise fishing activities
  - Stability in mortality limits
  - Provide directed fishing yield

MSE Webpage:

<https://www.iphc.int/management/science-and-research/management-strategy-evaluation>

# Primary Performance Metrics

## *Biological Sustainability*

- Probability female SB  $>$  20% of B0
- Probability female SB in R2  $>$  5% of coastwide SB
- Probability female SB in R3  $>$  33% of coastwide SB
- Probability female SB in R4  $>$  10% of coastwide SB
- Probability female SB in R4B  $>$  2% of coastwide SB

# Primary Performance Metrics

## *Fishery*

- Probability coastwide female SB > 36% of B0
- Probability Annual Change in TCEY > 15% in any 3 yrs of 10
  - coastwide and by IPHC Regulatory Area
- Median AAV
  - coastwide and by IPHC Regulatory Area
- Median TCEY
  - coastwide and by IPHC Regulatory Area
- Median %TCEY in each IPHC Regulatory Area
- Minimum TCEY in each IPHC Regulatory Area
- Minimum %TCEY in IPHC Regulatory Area

# Ad hoc MSAB meeting (1)

## *Para 11 to 14: Improvements to MSE Explorer*

- Tables to summarise the simulations available;
- Clear identification of primary objectives and relative performance metrics;
- Ranking tables

## *Para 15 to 16: Performance Metrics*

- Guided and unguided recreational (not possible at this time)
- TCEY at IPHC Regulatory Areas level
- Relative percentages of TCEY across IPHC Regulatory Areas
- Anything that is part of a catch-sharing plan

# Ad hoc MSAB meeting (2)

*Para 21: Potential bugs*

- MP-B: *fixed*
- MP-C: *fixed*
- Total mortality: *now reporting TCEY*

# Estimation Error

- Three methods for implementing estimation error
  1. No estimation error
    - For comparison, not to choose from
  2. Simulated estimation error (as with coastwide MSE)
    - Currently the best method
  3. Modelled estimation error (a stock assessment model)
    - For comparison

# MP comparison

# Recommendations

- a) **NOTE** paper IPHC-2020-MSAB016-09 which provides performance metrics for primary objectives for MSE simulations using six priority 1 management procedures.
- b) **RECOMMEND** management procedures that meet primary objectives and perform best given consideration of trade-offs and possibly additional performance metrics.
- c) **RECOMMEND** additional performance metrics that would be useful for the evaluation of management procedures.
- d) **RECOMMEND** alternative ways to display and communicate results to assist in the evaluation of management procedures.
