IPHC NOTIFIES INDUSTRY OF HALIBUT SALES IN 2006 AND SEEKS BUYERS INTERESTED IN IPHC RESEARCH FISH

The International Pacific Halibut Commission (IPHC) will be conducting research operations off Oregon, Washington, British Columbia and Alaska during 2006 and will be selling halibut caught during the operations to offset costs associated with conducting the research programs. This news release is intended to notify the industry of IPHC sales plans and seeks offers for fish sales arrangements from interested buyers.

We anticipate that all landings will be between early June and early September 2006. Approximately 15 vessels may be involved in the survey, and average trip size for halibut is expected to range from 8,000 to 45,000 pounds. Small amounts of rockfish and Pacific cod may also be landed. All of the fish will be well iced, and we will attempt to keep all of the fish less than six days old when selling into markets where the fish are marketed fresh. Older fish may be landed when selling into frozen markets. Suggestions from industry on how the IPHC can maximize fish quality or improve fish sales are welcome.

In 2006, sales will be awarded based on our objectives of achieving a fair market price and distributing sales among buyers and ports. Sale agreements will be based on prices at the time of the sale. The Commission will not enter into any consignment or profit sharing arrangements. The Commission plans to contact interested halibut buyers prior to each landing. Preferences will be given to buyers with a history of successfully marketing halibut and following ethical business practices. In awarding sales, the Commission will consider: (1) price; (2) the number of years buyers have been buying and marketing halibut; (3) how fish are graded **at the dock** including the determination of No. 2 halibut and chalky fish; and (4) promptness in settlements following deliveries. Obtaining a fair market price will be a primary consideration in awarding fish sales, but the Commission may award sales to buyers with slightly lower prices when the factors listed above are considered. The Commission will also attempt to distribute sales among as many qualified buyers as possible, subject to fair market value.

For the port of Dutch Harbor as well as for sales in Washington and Oregon we are interested in hearing from parties who would like to enter into a direct sales arrangement. We will then contact interested parties in early May to request preseason bids for the fish sales from the IPHC charter(s) before awarding the sales. For Washington and Oregon it is likely that our charter fish from all small offloads would go to a sole buyer. In Dutch Harbor, it could go to a sole buyer or be rotated between buyers on a schedule for fair market price.

Continued.....

All buyers (including those with past IPHC sales history) interested in purchasing IPHC research fish in 2006 should send a letter, fax, or e-mail to Claude Dykstra (claude@iphc.washington.edu) at the Commission **before April 15, 2006**. The letter should provide information regarding the ports in which you intend to actively purchase, and both general contact information for your company as well as port specific contacts (where applicable). This will ensure you are kept informed of purchasing opportunities through out our field season. For further information, please call (206) 634-1838, and contact Claude Dykstra (ext. 213) or Heather Gilroy (ext. 206).
