A total of 25 eligible members lodged an accreditation/authorisation form for the meeting, however, only 15 were present at the commencement of the Session from the two (2) Contracting Parties. Two proxies were submitted. The meeting was opened by Mr Carl Nordmann (President of HANA) who welcomed participants.

The following are a subset of the complete recommendations and requests for action from the PAB027, which are provided at [Appendix IV](#).

IPHC Fishery Regulations: Mortality and Fishery Limits (Sect. 5)

PAB027-Rec.03 ([para. 20](#)) The PAB **RECOMMENDED** that the Commission adopt the framework contained in proposal IPHC-2022-AM098-PropA1, with the addition of the mortality limits for each Contracting Party, by sector, as detailed in Section 5.3). [*In favour=12; against=0; abstain=2*][Proxy: *In favour=2 against=0; abstain=0*].

Rules of Procedure - PAB

PAB027-Rec.06 ([para. 39](#)) The PAB **RECOMMENDED** that Parliamentary procedure is the preferred process for accepted rules, ethics, and to conduct the meetings of the PAB.

1. OPENING OF THE SESSION

1. The 27th Session of the International Pacific Halibut Commission (IPHC) Processor Advisory Board (PAB027) was held electronically from 25-27 January 2022. A total of 25 eligible members lodged an accreditation/authorisation form for the meeting, however, only 15 were present at the commencement of the Session from the two (2) Contracting Parties. Two proxies were submitted. The list of participants is provided at [Appendix I](#). The meeting was opened by Mr Carl Nordmann (acting President of HANA) who welcomed participants.

1.1 Accreditation/Authorisation

2. Canada accredited 0 new members and the USA accredited 2 new members, for participation in the 2022 Processor Advisory Board proceedings, as follows:
 - a) Sitka Salmon Shares (USA). Representative: Ms Michael Kohan;
 - b) Alaska Glacier Seafoods Inc. (USA). Representative: Ms Jessie Keplinger.
3. The PAB **NOTED** that due to a contradiction in the PAB's Rules of Procedure, proxy votes would need to be tallied separately for this meeting. The contradiction is that only members present can vote, however the proxy rule suggests otherwise. The rules of procedure need to be revised.

1.2 Election of Chairperson and Vice-Chairperson

4. In accordance with Appendix IV, Section III of the IPHC Rules of Procedure (2021), the PAB **NOTED** the requirement to elect a Chairperson and a Vice-Chairperson of the PAB for one year, or until a replacement is elected.
5. The PAB **CALLED** for nominations for the position of Chairperson of the PAB for one year, or until a replacement is elected. Jessie Keplinger (USA) was nominated, seconded and elected as Chairperson.
6. The PAB **CALLED** for nominations for the position of Vice-Chairperson of the PAB for one year, or until a replacement is elected. Carl Nordmann (Canada) was nominated, seconded and elected as Vice-Chairperson.

2. ADOPTION OF THE AGENDA AND ARRANGEMENTS FOR THE SESSION

7. The PAB **ADOPTED** the Agenda as provided at [Appendix II](#). The documents provided to the PAB027 are those submitted for the 98th Session of the IPHC Annual Meeting (AM098). To assist the PAB in navigating its meeting, all documents relevant to the agenda were posted as links on the PAB webpage: <https://www.iphc.int/venues/details/27th-session-of-the-iphc-processor-advisory-board-pab027>

3. IPHC SECRETARIAT INFORMATIONAL SESSION

3.1 Mortality Limits and TCEY

8. The PAB **NOTED** the informal presentation by Dr Ian Stewart (IPHC Quantitative Scientist).

3.2 MSE update

9. The PAB **NOTED** the review of the MSE process and MSAB reports provided by Dr Allan Hicks (IPHC Quantitative Scientist).

3.3 Pacific Halibut Multiregional Economic Impact Assessment (PHMEIA)

10. The PAB **NOTED** the information presentation by Dr Barbara (Basia) Hutniczak (IPHC Branch Manager) which included a broad overview of her current work to better understand the economic contribution of Pacific halibut and the connectivity to the supply chain with initial focus on the commercial fishery.

4. FISHING PERIODS: SEASON OPENING AND CLOSING DATES

11. The PAB **RECOMMENDED** the following fishing period dates for 2022:
- Opening: 8 March [in favour=12; against=4; abstain=0]; [Proxy in favour=1; abstain = 1]
 - Closing: 8 November [in favour=12; against=4; abstain=0] [Proxy in favour=1; abstain = 1]
12. The PAB **NOTED** that four members (3 Canadian, 1 USA) voting against these dates were supportive of a longer season (6 March to 7 December).

5. MORTALITY LIMITS

13. The PAB **NOTED** the IPHC's web-based mortality projection tool for use in the PAB027 and AM098 (<https://www.iphc.int/data/projection-tool>).

5.1 *Coastwide perspectives*

14. The PAB **AGREED** to support a TCEY of 41.22 M lbs which is equivalent to an F43 fishing intensity. [In favour =15; Against = 0; Abstain = 0] [Proxy: In favour: 2]

5.2 *Regulatory Area perspectives*

15. Nil

5.3 *TCEY Recommendations*

16. The PAB **RECOMMENDED** the following TCEY mortality limits for the 2022 fishing period as provided in [Table 1](#), which translate to the mortality estimates by sector (as provided by the IPHC Secretariat) provided in [Appendix III](#) and an SPR of 43% [*In favour=12; against=2; abstain=0*][Proxy: *In favour=2; against=0; abstain=0*].
17. The PAB **NOTED** that the numbers in [Table 1](#) honor the interim agreements for IPHC Regulatory Area 2A and 2B. The PAB accepted the scientific advice given by Dr Stewart in deciding on a coastwide harvest intensity of F43. In considering area specific distribution the PAB used the following reasoning in designating limits for areas 2C and 3B:
- Area 2C-5.19 Mlbs. A limit of 5.19 Mlbs matches what would have been referenced for IPHC Regulatory Area 2C without an Interim Agreement, as well as being lower than 2021 adopted mortality limit. Acknowledging a need for adjustment down according to the survey data but not such a dramatic drop as suggested when considering the interim agreement which would have decreased 2C by just over 1 M lbs or 20%, when other areas in fishing region 2 either maintained status quo or increased. Further, the average weight of fish landed in 2C dropped a significant amount, and which has been attributed to the recruitment from 2012 year class and not from a lack of large fish.
 - Area 3B-4.28 Mlbs. The IPHC Secretariat TCEY distribution without an interim agreement would have been 6.47 Mlbs. The PAB recalled historically there was a reduction of quota after going up too quickly in area IPHC Regulatory Area 3B, as well as the Slow-Up-Fast-Down policy to prevent high interannual variations. We felt that it was responsible to not increase the quota by over 100% in one area. The PAB is suggesting a 37% increase rather than a more than 100% increase.
18. The PAB **NOTED** that two members (2 USA) voted against the recommended area specific mortality limits because they lacked confidence in survey numbers in IPHC Regulatory Area 2C and were concerned with the distribution of the resource being given to IPHC Regulatory Area 2B, who are fishing well above the Secretariat recommendation.

Table 1. Processor Advisory Board (PAB) recommended TCEY mortality limits for 2022. See previous paragraphs for voting.

IPHC Regulatory Area	Mortality limit (TCEY) (mlbs)
2A	1.65
2B	7.56
2C	5.19
3A	14.37
3B	4.28
4A	2.39
4B	1.80
4CDE	3.98
Total (IPHC Convention Area)	41.22

(para. 26) “*The FAC AGREED that:*

- a) *the proposed amendments to the PAB terms of reference and rules of procedure seem sensible, and will align the PAB with the practices of the Commission and its other subsidiary bodies.*

- b) *the IPHC Secretariat is the Commission's administrative body tasked with the organisational, administrative, communications, and recruitment facilitator roles for its subsidiary bodies, among other roles and responsibilities;*
- c) *unless there is a compelling reason provided by the Co-Chairs of the PAB027, to retain the current approach whereby the Halibut Association of North America (HANA) is described in the PAB Terms of Reference as the administrative, communications, and recruitment facilitator for the PAB, that the Commission should move to approve the amendments as proposed."*

(para. 27) *The FAC **RECOMMENDED** that the Commission adopt the International Pacific Halibut Commission Rules of Procedure (2022), as provided in IPHC-2022-FAC098-09, while taking into consideration any additional advice received from the PAB027, as well as to amend para. 1.a of the RAB ToR's to read as follows:*

"1.1.a Suggest research topics to be considered for incorporation in the IPHC integrated research and monitoring activities, as well as to comment upon operational and implementation considerations of those research and monitoring activities."

- 39. The PAB **RECOMMENDED** that Parliamentary procedure is the preferred process for accepted rules, ethics, and to conduct the meetings of the PAB.
- 40. The PAB **AGREED** that it would like HANA to continue to play an active role within the PAB should the IPHC Secretariat assume the Secretariat role. Utilizing HANA as a liaison for other support services such as pre-meeting onboarding, providing information and other documents, in meeting support, and to help complete the minutes from the PAB meeting. Furthermore, as there is a generational transition of the members of the PAB. HANA has remained a constant in guiding the PAB throughout the process and helping the Chairs facilitate a productive meeting. While also providing historical context to PAB action and decisions making in past meetings. HANA participates and compiles relevant information from many other Management organizations/Industry groups which is then provided to the PAB Membership.
- 41. The PAB **NOTED** that it intends to establish a working group to coordinate with the IPHC Secretariat on further revisions to the rules of procedure, which could include a role for HANA. 8. OTHER BUSINESS

- 42. The PAB **NOTED** that a long-term distribution policy should include the following components.
 - a) Mortality limits for regulatory areas are based on indices derived from the most current scientific data and a range of explicit policy choices to provide a higher level of predictability and stability in each regulatory area.
 - b) Explicit policy consideration should be evaluated by the MSE framework.
 - c) Negative impacts from one regulatory area to another should be minimized.
 - d) Margins of uncertainty in year-to-year coastwide mortalities should be narrowed by using smoothing elements such as keeping maximum annual variability below 15% or Slow Up/Fast Down.
 - e) At the regulatory area, minimize variability in year-to-year survey abundance indices, such as a 3- to 5-year rolling average or Slow Up/Fast Down.
 - f) Be developed in a transparent process with adequate input from stakeholders.
 - g) Continue to improve the monitoring of all removals both in the directed and non-directed fishery.
 - h) Multi-year agreement between Countries based on science to give more stability to both parties.
- 43. The PAB **NOTED** that the Contracting Parties should begin negotiations as early as possible, recognizing that the current Interim Agreement will expire after the 2022 season.

44. Paragraphs [42](#) and [43](#) were voted together and passed unanimously. [*In favour=14; against=0; abstain=0*][*Proxy: In favour=2; against=0; abstain=0*].
